Pressed Steel Thread Protectors

Revata Engineering's Pressed Steel Thread Protectors are designed & manufactured to protect the API Drill pipes, Drill Collars connections and tubing made as per API 5D, 7 & 5CT respectively.

Features:

- Maximum Protection for tool joint threads and seals.
- Maximum Protection from Corrosion.
- Impact Protection during handling & transportation.

Revata Engineering's pressed Steel Protectors are made from 3mm thick E.D.D. QUALITY Steel sheets and machined with precision using CNC machines. The protectors then undergo Manganese Phosphating & Dehydrating to make them rust free.

Manganese Phosphating- A hot Phosphating process that reduces galling, improves adhesion of thread compound & prevents steel to steel contact which helps protect functional properties of thread ends.

Hot Phosphating is just one more reason why Revata Engineering's pressed Steel Thread Protectors are more preferred by the customers.

The Standard Threads and Sizes available are:

Tubular / Line Pipe End Caps

Revata Engineering manufactures a wide range of Pipe End Caps for Tubulars / Pipes used in various industries. These are manufactured in LDPE, LLDPE, PP, PE and also in various Metals based on customer requirements.

They are also used for many other applications such as covering open tubing holes in various equipment during transportation or storage to avoid foreign objects entering the equipment and causing it to malfunction or get damaged.

**WE MANUFACTURE PIPE END CAPS FROM SIZES STARTING FROM A FEW
MILIMETERS RIGHT UPTO 72" (SEVENTY TWO INCHES).**

- ✦ End Caps allows your manufactured products to arrive at their destination in the same condition that they left in.
- ✦ End Caps will save you the cost and time that will come from rejects and it is a way to have inexpensive insurance for your manufactured products.
- ✦ End Protection Caps are to protect and cover the ends of pipe from being damage in storage, shipping, transit, and before installation.
- ✦ It keeps the inside pipe clean from dirt, debris, and animals.
- ✦ The special grade of UV stabilized End Caps perform extremely well in extremely hot and dry temperatures in areas such as Middle East.
- ✦ Special caps for odd sized pipe, extra-large, square, and rectangular end pipe is also available.
- ✦ Desiccant bags can be supplied along with the End Caps. Desiccant bags are placed inside the Pipes to absorb moisture and reduce humidity.

Tubular / Line Pipe End Caps & Protectors - SIZES

Special sizes can be made to order.

ID Fitting Pipe End Plugs

- ✦ Revata Engineering's ID fitting Pipe Plugs are suitable for a wide range of Line Pipes with varying wall thicknesses.
- ✦ The flexible fins ensure a snug fit onto the pipe ID and prevent fall outs.
- ✦ The ID fitting Pipe Plugs do not require lifting the pipes as compared to the Outside diameter fitting pipe end caps. This saves valuable labour cost involved in lifting each pipe to fit the end caps.
- ✦ With the rigid LDPE material used for production of this type of flanges, it is resistant to most Acids, Alkaline and other chemicals thus making it an ideal protection choice in harsh environment and usage conditions.
- ✦ The Pipe Plugs are UV stabilized for long lasting usage during exposure to extreme sunny conditions during outdoor storage.

The ID fitting Pipe Plugs are available in the following sizes:

LDPE Material Specification

ID / BORE Fitting Large Face Flange Protectors

- ✦ Revata Engineering's ID / Bore Push-Fit Large Face Flange protectors offer the ultimate protection when it comes to flange face protection.
- ✦ The flexible fins ensure a snug fit into the bore every time.
- ✦ These flange protectors do not require any fasteners and have a single point installation thus providing the shortest installation time.
- ✦ With the rigid LDPE material used for production of this type of flanges, it is resistant to most Acids, Alkaline and other chemicals thus making it an ideal protection choice in harsh environment and usage conditions.
- ✦ The flange covers are UV stabilized for long lasting usage during exposure to extreme sunny conditions during outdoor storage.

The ID / BORE Large Face Flange Protectors are available in the following sizes:

LDPE Material Specification

Full Face Flange Protectors

- ✦ Revata Engineering's Push-Fit Full Face Flange protectors offer the ultimate protection when it comes to Flanges.
- ✦ The unique design allows protection of the sides too which remain unprotected in most of the flange cover designs.
- ✦ With the rigid LDPE material used for production of this type of flanges, it is resistant to most Acids, Alkaline and other chemicals thus making it an ideal protection choice in harsh environment and usage conditions.
- ✦ The flange covers are UV stabilized for long lasting usage during exposure to extreme sunny conditions during outdoor storage.

The Full Face Flange Protectors / Flange Covers are available in the following sizes:

DN	Flange Size (In Inches)	Pressure Rating
DN 40	1.5	#150, #300, #600
DN 50	2	#150, #300, #600

Bore Fitting Flange Protectors

- ✦ The Bore Fitting Flange Protectors offer the best Bore protection ensuring that the flange bore area is not damaged. They also offer flexibility of one size fitting all pressure ratings of the flanges thus avoiding expensive inventory and storage costs.

The Bore Fitting Flange Protectors are available in the following sizes:

Bolt Hole Snap-On Flange Protectors

- ✦ The Bolt Hole / Snap-On Flange Protectors are the most standard and commonly used flange protectors in the industry.
- ✦ They are light weight, easy to ship and provide maximum space savings compared to any other type of flange protector.
- ✦ Being specific to the size and pressure rating of the flange, they offer a perfect fit protecting all critical areas of the flange.

The Bolt Hole / Snap-On Flange Protectors are available in the following sizes:

DN	Flange Size (In Inches)	Pressure Rating
DN 15	1/2	125lb, 150lb, 300lb, 600lb, 900lb
DN 20	3/4	125lb, 150lb, 300lb, 600lb, 900lb
DN 25	1	125lb, 150lb, 300lb, 600lb, 900lb
DN 40	1.5	125lb, 150lb, 300lb, 600lb, 900lb
DN 50	2	125lb, 150lb, 300lb, 600lb, 900lb
DN 65	2.5	125lb, 150lb, 300lb, 600lb, 900lb

Bumper Protection Rings for High Chrome Casing / Tubings

Revata Engineering manufactures reliable high impact resistant bumper rings / spacer rings for Drill-Pipes, Tubings and Casings. The Bumper Rings can be supplied in either UV stabilized LDPE or PP materials.

The Tubular Protection Bumper Rings are used:

- ✦ To prevent contact between two pipes during Transportation, Handling and Storing operations.
- ✦ To prevent corrosion and damage caused by the pipe surface coming into contact during Handling, Storage or Transportation.

Revata Engineering has developed a special blend of compound that maintains their strength and rigidity even under heavy handling and storage conditions. The easy to install and safe to use Bumper Rings are a cost effective means of preventing any pipe to pipe contact thus eliminating damage or corrosion.

Our R&D team constantly gathers end-user feedbacks and conducts various tests to improve the designs as well as to ensure that the products are manufactured as per high quality and performance standards.
